PRESENTATION

Pwn & Patch is a cyber security startup with a deep focus on offensive security projects and solutions. It is based in Tunis and Paris with business partners and clients in 15 countries and 3 continents. Pwn & Patch main solution, Oktoboot, is a threat intelligence platform that monitors Dark web for data breaches. It allows to its clients to reduce their attack surface and quickly detect data breaches identified in Dark web and underground hacking forums and marketplaces.

In addition to its solution Oktoboot, Pwn & Patch is providing professional security services for companies. the services provided are

- Cyber Security Audit
- Information Security Audit
- Cloud Security
