PRESENTATION

Sghartoon is a tele therapy for learning difficulties based on games . we digitise the detection and treatment tools by offering therapeutic games for parents, therapists and schools.

Sghartoon focuses on providing a tool to detect symptoms of those learning difficulties through fun digital games created by therapists and linking patients with therapists closest to them. We also offer a fool digital for therapists containing a games library , a patient management tool and mush more to make their work easier and get them in contact with more parents Democratising the educational system for these kids is our objective
