PRESENTATION

TRUE DELTA automates Back office manual tasks involving document recognition and data reconciliation process. We offer:

- Data extraction from documents using OCR techniques
- Fast onboarding & data integration
- Efficient data reconciliation with intelligent matching tools & less coding

True Delta is a cloud based solution designed for back officers in the financial sector to automate document recognition and data reconciliation process. Processing high volume of data, document recognition using OCR and intelligent matching rules to automate data reconciliation. Our tool improves data quality, help reduce operational cost and operational risk by minimizing human intervention.
